SUMMARY

Full-stack engineering student and Full Stack Development Intern at Atlas Systems, with experience in real-time data pipelines, API integrations, and AI-driven applications using Python, TypeScript, and React. Co-author of NLP backdoor-attack research.

EDUCATION

BE in Computer Science | Dayananda Sagar College of Engineering, Bengaluru | CGPA: 8.88/10 | 2027 *(Graduation)*

- Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Objects & Design, Computer Organization & Programming, Combinatorics, ML, AI, Statistics & Applications

XII in Computer Science | Army Public School, Ballygunge | Percentage: 97% | 2023

X | Army Public School, Tenga Valley | Percentage: 95% | 2021

EXPERIENCE

Full Stack Development Intern | **Atlas Systems** | Bengaluru | *Oct 2026 – Present*

- **Built authentication and account-recovery features** on .NET 10 Azure Functions: session-based auth, role-based access control, invitation-based registration, and password reset with expiring single-use tokens.
- **Designed and implemented 18 reusable AI development skills and an autonomous orchestrator** using Antigravity for OpsPulse, an enterprise operations platform, standardizing the lifecycle from requirement analysis to release management, cutting token usage by 23% and saving manual prompting time across 2 teams.
- **Added automated API, frontend, and end-to-end tests** while following security practices for multi-tenant applications.

Software Engineer Intern | **CREDFIT** | Bengaluru | *Aug 2025 – Dec 2025*

- **Engineered a real-time data pipeline** interfacing directly with Tally's API, transforming complex financial and inventory data for seamless ERP integration and syncing 5,000+ records daily, with retry handling and idempotent writes to prevent duplicates.
- **Automated core business workflows** by building custom Frappe/ERPNext API endpoints and server scripts to securely process incoming data, handle validation, and ensure accurate GL-posting logic, cutting manual entry by 60%.
- **Debugged and maintained backend services,** ensuring clean data flow between independent systems, resolving 25+ issues.

PROJECTS

AETOS: AI-Powered Technology Intelligence Platform | GitHub

- **Developed a comprehensive intelligence platform** utilizing AI APIs, LLMs, and agentic workflows for automated data enrichment and intelligent reporting, cutting report turnaround by 70%.
- **Engineered a responsive frontend and robust backend architecture,** ensuring clean data flows, secure authentication, and practical safeguards for AI-generated outputs.

Axiom: Finance Analysis App | GitHub

- **Developed and deployed a full-stack finance analysis tool** using FastAPI and PostgreSQL (Supabase) for data management.
- **Built an interactive React.js frontend** to render dynamic data visualizations, deployed on Vercel with 99.9% uptime.

Metric: P2P Fair Lending Platform | GitHub

- **Developed a full-stack P2P lending platform** using Next.js, TypeScript, and MongoDB, featuring an ML-driven risk score (88% accuracy) and secure, role-based dashboards with NextAuth.js.

RESEARCH

Confidence-Driven Backdoor Poisoning in Text Classification | *Manuscript submitted to IEEE T-IFS (under review)*

- **Co-authored a study of confidence-driven backdoor poisoning** against BERT and DistilBERT text classifiers, measuring sample efficiency, survival under knowledge distillation, and defense evasion across four datasets (SST-2, AG News, IMDB, Yelp Polarity).

ACTIVITIES AND LEADERSHIP

- **Hackathons:** Participated in Smart India Hackathon (national level) and HackBangalore (24-hour hackathon).

COURSES

Data Analysis Professional Certification, IBM (2025) | **Google Cloud Computing Foundations**, Google (2026) | **Centre for Innovation and Leadership Certificate**, DSCE (2025)

SKILLS

- **Programming**: Python, JavaScript, TypeScript, SQL, C++, C
- **Problem Solving**: Gold (5-star) badge in Python on HackerRank | HackerRank
- **Frameworks & Libraries**: React.js, Next.js, FastAPI, Node.js, Frappe/ERPNext, .NET 10, Bootstrap
- **Databases**: PostgreSQL, MySQL, MongoDB, Supabase
- **Tools & Cloud**: Docker, REST APIs, Webhooks, Git, VS Code, WSL, Vercel, Google Cloud, Azure Functions
- **AI & Computer Vision**: LLM APIs, Antigravity, OpenCV, MediaPipe, Transformer models (BERT, DistilBERT)

AWARDS

- **Medha Samman and Prabhat Samman Awards of Excellence | 2023** | Top results in the Class XII Board Examination.
